

BuildFlow Services Catalog

Complete list of products, modules, and capabilities
Construction ERP · Inventory / Stock · Platform Admin

Version 2.0 · Generated for internal team use

This document lists every major service BuildFlow provides today across its two product modes and the Platform Admin console. Use it as a product reference for onboarding, demos, and planning.

1. Product overview

BuildFlow is a multi-tenant SaaS platform with **two product modes** on one stack, plus a separate **Platform Admin** console for operator/tenant management.

Product	Who it serves	What it does
Construction ERP	Contractors, PMs, site & accounts teams	Projects, estimates/BOQ, planning, site ops, procurement, accounting, reports
Inventory / Stock	Material suppliers, retail, wholesale, traders, events businesses	Stock, SKUs, parties, quotes, sales, warehouse, procurement, invoices/bills, GST flows
Platform Admin	BuildFlow operators	Tenant companies, subscriptions, escalated support tickets

2. Shared platform services

- **Authentication** — Email/mobile OTP login (SMS/email delivery; seed/dev master OTP supported).
- **Multi-tenant companies** — Company signup, invites, roles, and isolated data per tenant.
- **Role-based access control** — Permission catalog with company-customizable role matrices.
- **BuildFlow Assistant** — In-app AI assistant (permission-aware tools) for construction & inventory.
- **Notifications / Alerts** — In-app notification center (e.g. overdue invoices).
- **Support tickets** — Company tickets with escalation path to Platform Admin.
- **Audit log** — Track sensitive/admin actions.
- **Integrations** — WhatsApp, Razorpay, and related company integrations settings.
- **Subscription & billing** — Plan/billing management at company level.
- **Data export / backup** — Company data export from settings.
- **Client & subcontractor portals** — Tokenized portal access for external parties.
- **Offline-aware mobile UX** — Designed for field + desktop (web & mobile viewports).

3. Construction ERP services

*Product mode: **construction**. Primary navigation: Home, Projects, Planning, Proposals, Reports, Accounting, Reports Hub, Alerts, Settings, plus Assistant overlay.*

3.1 Home / Owner Dashboard

- KPI cards: active projects, revenue, outstanding, average progress
- Cash flow forecast, budget burn / project progress, estimation accuracy
- Team productivity & material price trend widgets
- Quick actions into projects, reports, accounting, proposals, settings

3.2 Projects

- Create and manage projects (planning → in progress → completed, etc.)
- Project detail workspace for BOQ, procurement, variations, drawings, quality, labor
- Soft-delete / restore (permission-gated)
- Project members, budget, and financial visibility by permission

3.3 Estimation & BOQ

- Create, edit, submit, approve/reject estimates
- Convert approved estimate to Bill of Quantities (BOQ)
- BOQ edit, CSV import, rate visibility controls
- Record executed measurements against BOQ items
- Export estimates (Excel / PDF)
- Rate analysis library and estimate compare flows

3.4 Proposals & tendering

- Create and manage client proposals
- Proposal workflow tied to estimation/commercial process
- Portal management for client/subcontractor access

3.5 Planning (WBS / CPM)

- View WBS, tasks, and Gantt/schedule planning
- Create/edit WBS items, tasks, and dependencies

3.6 Site operations & reports

- Daily site reports (view/create)
- Geo-fenced attendance check-in / check-out
- Attendance records visibility

3.7 Procurement & site stock

- Material indents / requisitions (including from BOQ shortfalls)
- Indent approval, direct PO creation, rate override, PO approval
- Goods Receipt Notes (GRN)
- Excess-order controls vs BOQ estimated limits
- Site stock view, movements (in/out/transfer), manual adjustments

3.8 Subcontracting

- Subcontractor work orders
- Measurement approval for subcontract work

3.9 Change orders / variations

- View, create, approve/reject change orders

3.10 Drawings & blueprints

- View/upload drawings and revisions
- Manage drawing status and approval revisions

3.11 Quality — snags & NCRs

- Snag/defect logging with evidence photos
- Rectify, status update, and sign-off

3.12 RFIs & submittals

- Raise and answer RFIs
- Material / shop-drawing submittals review & approval

3.13 Labor muster & wages

- Gang muster and overtime recording
- Weekly wage settlement / payout approval

3.14 Petty cash

- Site petty cash / float expense vouchers
- Receipt capture, approve/reject workflow

3.15 Accounting

- Client invoices (Standard / RA / Milestone)
- Record client payments
- Vendor bills create/approve and record payments
- Import bills support
- Tally XML export for invoices & bills
- Financial amount / profit / budget visibility by permission

3.16 Reports Hub

- Central finance/ops report viewing
- Download PDF / Excel reports
- Report branding settings

3.17 Construction admin settings

- Company profile & logo
- Users, invites & roles
- Role permission customization
- Material prices / resource library
- Rate regions & regional pricing
- Rate analysis library
- Integrations, billing, audit log, export/backup, support tickets
- Personal profile & help

4. Inventory / Stock services

Product mode: **inventory**. Shell navigation: *Stock, Materials, Parties, Quotes, Sales, Warehouse, Procurement, Invoices, Bills, Settings (+ Reports, Notifications, Assistant)*.

4.1 Stock home

- On-hand stock by warehouse with inventory value overview
- Search, barcode/QR scan, adjust, and checkout actions
- Opening stock import
- Anomaly / overview strip for stock health

4.2 Materials (SKU catalog)

- Material/SKU master with units and pricing
- Suggested catalogs by business profile / vertical
- Batch/expiry (FEFO) support for general retail vertical demos

4.3 Parties

- Customers and vendors (party master)
- Search/filter and cross-navigation into sales/procurement

4.4 Quotes

- Customer quotations / event-quote wording for Events vertical
- Quote lifecycle ahead of sales conversion

4.5 Sales

- Sales flows including SO / delivery / returns / notes style ops
- POS-style checkout from stock
- List filters and status tabs

4.6 Warehouse

- Multi-warehouse locations
- Transfers, staging, counts / warehouse operations

4.7 Procurement

- Purchase-side procurement for restocking
- Vendor-linked buying workflows
- Filtered list navigation into bills/parties

4.8 Invoices (AR)

- Sales invoices with search/status filters
- GST-oriented commercial docs
- Invoice detail views and payment tracking

4.9 Bills (AP)

- Purchase bills with sticky filters
- Vendor bill lifecycle for inventory tenants

4.10 Inventory reports

- Inventory analytics / ops reports screen

4.11 Inventory settings & profiles

- Business profile (material supplier, retail, wholesale, distribution, trading, equipment, general)
- Shop verticals: GENERAL and EVENTS capability lanes
- Language preferences, team/users, notifications
- Company-level inventory configuration

4.12 Inventory business profiles (demo catalog)

- Material supplier (construction materials)
- Retail store / Kirana (GENERAL + batch/expiry FEFO)
- Wholesale / cash & carry
- Distributor / stockist
- Trader / trading company
- Equipment dealer / rental
- Events & lighting (EVENTS vertical)
- General business

5. Platform Admin services

Separate login at */platform/login* (not the company OTP login).

- Platform dashboard — company count and open escalated tickets overview
- Companies — search tenants, update subscription and legal fields
- Escalated tickets — review requests escalated from company owners
- Platform admin authentication (email + password)

6. Roles that use these services

Construction roles

- Owner / MD — full access
- Project Manager (PM)
- Deputy Project Manager (DPM)
- Senior QC Engineer
- Mechanical Manager
- Store Incharge
- WeighBridge Incharge
- Site Supervisor
- Accountant

Inventory roles

- Owner — full inventory + settings
- Inventory Manager — day-to-day stock, sales, procurement

Platform

- Platform Admin — tenants, subscriptions, escalations

7. Capability summary matrix
